Everyone Plays

Magic Mirror helps to develop interaction and communication skills through creative multi-sensory game play. The software supports up to 6 players using full-body interaction with additional options for eye gaze, speech, switches, touch, game controllers, mouse, and keyboard inputs.

Communicate and Collaborate

Magic Mirror opens a new world of interactive game play, enabling people that use mixed access technologies to play together in fun activities. Create engaging communication apps and bring people together.

Develop Self Awareness

Magic Mirror provides many ways to explore sense of self through exploration of movements and expressions. This helps users to become aware that they are separate from others.

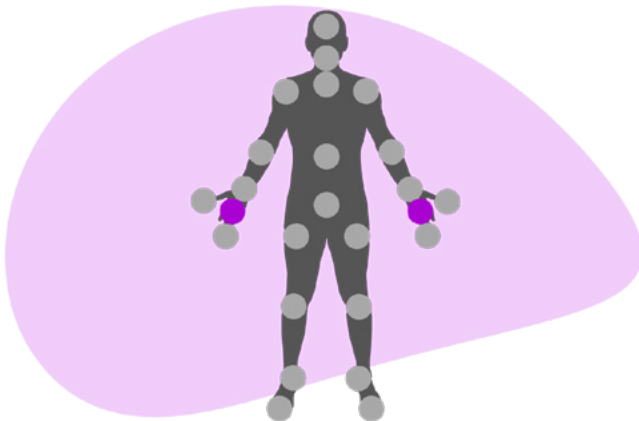

Magic Mirror is fantastic for our pupils – they love seeing themselves in the projection. It is very rewarding and hugely popular with the whole school.

David Orelebar – Rutherford School

Augmented Reality Playground

The body is the controller

Open up a fun new world of accessible interaction and bring your spaces to life with engaging kinaesthetic game play!

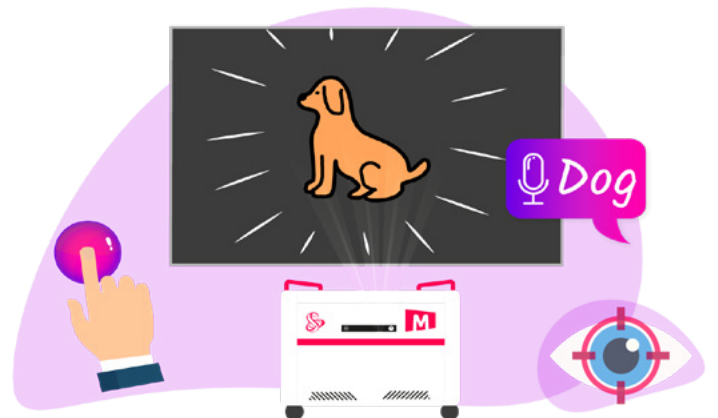

Inclusive

Any part of the body can be setup to control and interact with any of the 100+ Magic Mirror activities. Create custom activities to meet the needs of users.

Accessible

Magic Mirror is a uniquely accessible system that supports all modes of user interaction, from movement to eye gaze, touch, switch, speech, game controllers and more. Magic Mirror enables all participants to interact on equal terms. (Supports Tobii Eye Tracking)

Use Anywhere

Magic Mirror is used in schools, therapy centres, hospitals, adult care settings and leisure facilities for learning, therapy, and play!

Interaction Modes

Magic Mirror offers a range of exciting interaction modes that help to make the system suitable for people of all abilities.

01 Augmented Reality

Users will see themselves and their environment reflected in the display. Virtual objects and interactive content will appear around you to augment the experience; interact to bring your surroundings to life.

02 Inset Mode

Inset mode is the same concept as green screen, only with no need for a screen. Inset mode removes the background and immerses users in virtual play environments. This is great for helping to focus attention on the activity.

03 Shadow Mode

For those that do not like to see themselves in the video image, Shadow mode helps reduce anxiety by displaying the user as a shadow. Shadow mode also places users into a virtual play environment.

Facilitator Mode

When working with a single user it is possible to set Magic Mirror to only track one user. This means caregivers can appear in the scene to support a user without interfering with the activity.

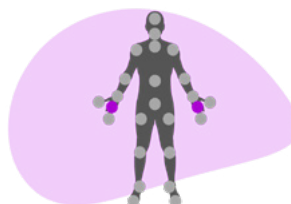

Make your own activities

The Magic Mirror activity creator makes it easy to create interactive scenes. Add visual resources; video, images, sounds and interactive objects to create tailored experiences.

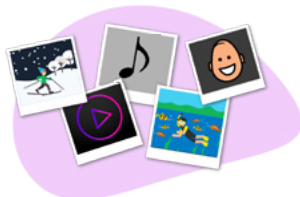

Game Objects

Create motivating and engaging visual scenes with interactive objects.

Body Control Points

Set collider points on any one of the 25 available body parts and allow users to interact using the body as a controller.

Personalisation

Import your own images, artwork, music, and photos to create highly personalised activities.

Design for needs

Set up eye gaze input, assign switches, speech commands and more to deliver accessible interactive game play for all.

Play, record, assess

Record user interaction in HD with in-screen game video showing how users interacted. Keep track of your sessions and use to record levels of engagement.

Software Features

Easy to control

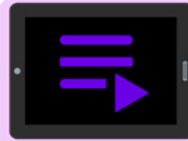

Magic Mirror has been designed with simplicity in mind; making it easy for people to work within any setting. The software is intuitive and packed full of useful features that make using the system an enjoyable experience for users and operators alike.

Activities

Magic Mirror comes with 100+ activities that are ready to play with any supported access method.

Playlists & Schedules

Create playlists and schedule them; Magic Mirror will run and launch apps without the need of an operator.

Collections

Group apps into your own custom collections for lessons, groups, themes, individuals or therapy sessions.

Favourites

Star your favourite apps to save them onto the home screen, so you can access them quickly.

App Control

Control Magic Mirror from your Android or Apple device and conveniently launch activities, create activities and set up playlists and schedules remotely.

The Magic Mirror app provides full control over your system including volume and shutdown.

System Options

Fixed or on the move?

Mobile

Mobile Magic Mirror is a plug and play system offering variable image size. Easy to store when not in use, Mobile Magic Mirror is a popular choice for Magic on the move!

Fixed

Fixed installations can be achieved in most locations where ambient light level can be controlled: Classrooms, Sensory Rooms, Hospital Wards and more. Call to discuss your requirements.

01 Training

Our knowledgeable trainers will show you how to work with Magic Mirror. They will walk you through the basics and teach you how you to create your own engaging Magic Mirror activities adapted to your users' needs, as well as sharing many useful tips on how to get the most out of your system.

02 Support

Our comprehensive support plans provide customers with the level of cover to match their operational and organisational needs. Our Standard Service Package is included on all Magic Mirror system for the first 12 months with options to upgrade your support plan to help ensure that you receive the level of service you require, when you need it.

Engagement, participation, cooperation, sharing, and teamwork are key learning skills that our pupils show constantly when using the Magic Mirror.

Katherine Lewis - Hazel Court School

Need a Magic Mirror demo?

We provide demos of Magic Mirror via web meeting and in person at our magic experience lab.
